(54) COMMUNICATION CONTROLLER

(57)Abstract:

PURPOSE: To attain the communication based on plural protocols.

CONSTITUTION: A host 50 is provided with a communication control part 53 as well as an application 51 and a common communication procedure control part 52. The part 53 produces the data adaptive to a prescribed procedure from the common data which are received from the part 52 and adaptive to plural protocols. Then the part 53 carries out the tasks for each protocol and performs the prescribed communication. These communication tasks are produced based on those data stored in a communication control table, a host communication library and a subordinate communication information storing part. Thus the general common data are processed and the communication is possible to a desired protocol.
